

**ATLAS IZEMZ
3D ELEVATION PRODUCTS**

MAKING NOTHING SOMETHING

Atlas iZemZ Geospatial Systems is a company providing high quality 2D/3D/4D geoproducts
With capabilities spanning a broad range of sectors, we provide satellite, aerial images
analytics and we design geosystems to unlock your daily business issues

2D/3D/4D Elevation Satellite & Aerial Products

SATELLITE DEM - DTM

DEM - DTM - 3D MODEL - ORTHOPHOTO

Resolution 30-50cm, 1m, 2m..10m | Configuration (Mono,Tri, Multi)-Stereo

AIRCRAFT DEM - DTM

DEM - DTM - 3D MODEL - ORTHO

Resolution ≤ 30 cm | Configuration Multi-Stereo - Video

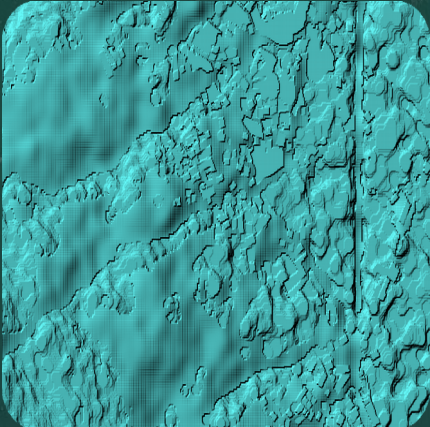

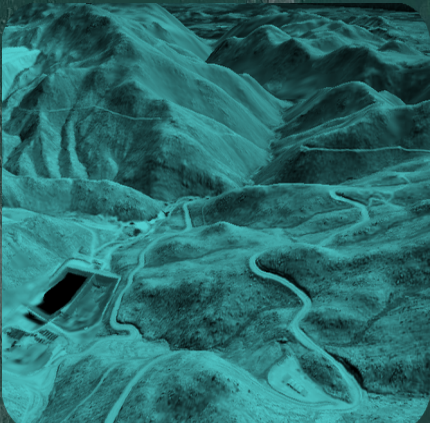

UAV DEM - DTM

DEM - DTM - 3D MODEL - ORTHO

Resolution ≤ 10 cm | Configuration Multi-Stereo

OUR PRODUCTS PORTFOLIO AND PRICING

Product	Description	Pricing
DSM-STANDARD VHR	 <p>Digital Surface Model is a representation of the earth surface, including building, trees..., in XYZ coordinates.</p> <p>DSM Standard product is a very high resolution model, generated from (multi-) stereo imagery using dense matching techniques. High level corrections and anomalies removal are applied to the data.</p> <p>Formats: GeoTIFF, XYZ ASCII.</p>	5-10\$/km² with a minimum order of 100km²
DSM-PREMIUM VHR	 <p>DSM Premium product is an improved version of the standard model. Automatic and semi-automatic corrections are applied to the data in order to sharpen and enhance its accuracy. (Buildings edges are sharpened for example)</p> <p>Formats: GeoTIFF, XYZ ASCII.</p>	10-20\$/km² with a minimum order of 100km²
3D TEXTURED MODEL	 <p>3D Textured Model is a natural color mesh approximating the surface of the globe.</p> <p>The textured mesh product provides smooth interaction and realistic 3D view of the scene.</p> <p>Formats: PLY, OBJ, COLLADA, CESIUM3D...</p>	10-20\$/km² with a minimum order of 100km²

DTM-DHM

Digital Terrain Model is a representation of the ground in XYZ coordinates.

Digital Height Model is a representation of objects height in XYZ coordinates. Those products are derived from DSM Standard or Premium.

Formats: GeoTIFF, XYZ ASCII.

5-10\$/km² with a minimum order of 100km²

CLUTTERS

Clutters and land use classification of surface features from satellite imagery. Atlas iZemZ provides clutters production using :

- Manual Editing
- Automatic Detection using Deep Learning

Formats: BINARY, ESRI SHAPEFILE, GEOJSON.

10\$/km² with a minimum order of 100km²

EXTRA SERVICES & CROSS PLATFORM APPS

Orthorectification
Pansharpener
Radiometric correction
Seamless mosaicking
Custom analytics
Desktop-Web-Mobile
2D/3D/4D apps
